ASSESSMENT TOOL 2: Technical Presentation

COURSE NAME:

Cloud Computing and
Big Data Analytics

COURSE CODE:

CSA1522

Name	VAISHNAVI.S
Register Number	192521313

COURSE OUTCOME COVERED

CO1: *Apply cloud computing technologies including hardware-software evolution, virtualization, web services, and service models to develop cloud-based solutions. (BL2)*

Assessment Tool Weightage: 10%

Dave's Taxonomy: Imitation (Level 1)

Question Count: 5

Total Marks: 50

Code of Conduct

I Vaishnavi S (192521313) (Name / Reg. No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment.

I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the student:

Assessment 1 asks

Technical Presentation Topics

Prepare a 6-8 minute presentation on any one of the following topics. Your slides must include definitions, architecture, industry relevance, and one practical example.

1. Cloud computing characteristics and benefits for startup ecosystems.
2. How virtualization enabled the growth of cloud service providers.
3. A comparative presentation on IaaS, PaaS, and SaaS for an educational institution.
4. Web services in cloud platforms: SOAP vs REST for enterprise integration.
5. Why XaaS is becoming a dominant consumption model in modern IT.

Minimum slide flow:

- Title and objective
 - Core technical explanation
 - Architecture or process diagram
 - Real-world use case
 - Conclusion and key takeaway
- 

Technical Presentation Rubric

Criteria	Weightage	Level 4 - Exemplary	Level 3 - Proficient	Level 2 - Developing	Level 1 - Beginning
Technical Content	30%	Content is highly accurate, relevant, and insightful	Content is correct with minor gaps	Basic content with limited depth	Content is inaccurate or superficial
Structure and Flow	20%	Excellent logical flow and slide organization	Good structure with minor issues	Some organization but weak flow	Disorganized presentation
Use of Visuals	15%	Visuals strongly support technical communication	Relevant visuals used well	Limited or unclear visuals	No meaningful visuals
Communication Skills	20%	Confident, clear, and engaging delivery	Clear delivery with minor hesitation	Moderate clarity but uneven delivery	Weak delivery and low clarity
Professionalism	15%	Well-prepared and audience-focused presentation	Mostly professional	Basic preparation visible	Poor preparation and professionalism

S.VAISHNAVI-[192521313]

INTRODUCTION

- Cloud computing delivers computing resources over the internet.
- It provides services such as storage, servers, and software on demand.
- Startups can use cloud services without purchasing expensive hardware.
- It helps businesses launch products quickly and efficiently.

CHARACTERISTICS OF CLOUD COMPUTING

KEY CHARACTERISTICS

- **On-Demand Self-Service** – Resources are available whenever needed.
- **Broad Network Access** – Services can be accessed from anywhere using the internet.
- **Resource Pooling** – Multiple users share computing resources securely.
- **Rapid Elasticity** – Resources can increase or decrease based on demand.
- **Measured Service** – Users pay only for the resources they use.

BENEFITS FOR STARTUP ECOSYSTEMS

BENEFITS

- Reduces initial investment costs.
- Enables faster product development and deployment.
- Easily scales as the business grows.
- Supports remote collaboration among teams.
- Improves data backup and disaster recovery.
- Encourages innovation with access to modern technologies.

APPLICATIONS AND CHALLENGES

Applications

- Web and mobile application hosting.
- Data storage and backup.
- Software development and testing.
- AI and Machine Learning services.
- Business analytics.

- **CHALLENGES**

- Data security and privacy concerns.
- Internet dependency.
- Vendor lock-in.
- Compliance with regulations.

FUTURE SCOPE

- Cloud computing will help startups grow with lower infrastructure costs.
- AI and IoT integration will create smarter cloud-based applications.
- Cloud services will become more secure and efficient.
- More businesses will adopt cloud technology for innovation and growth.

CONCLUSION

- Cloud computing provides flexible and cost-effective IT resources.
- Its characteristics make it ideal for startups with limited budgets.
- It supports business growth through scalability and accessibility.
- Cloud technology enables startups to innovate and compete effectively in the digital economy.
